- Confirm Quorum – *A quorum is constituted by the presence of a quorum of the Executive Board plus representation by a minimum of 3 SDAYC member clubs. The Fleet Executive Board can be counted for the purpose of ensuring representation of the 3 SDAYC member clubs.*
- RATIFY E-VOTES – NONE
- TEMPORARY RATINGS ABOUT TO EXPIRE - *A Temporary Rating may be provided by Chief handicapper in the event a handicap is requested to race in an upcoming race which will take place before a meeting, and the board is unable to vote on the rating (Prior to race). The request should be email approved or voted on at next board meeting to make permanent. In the event at a board meeting where an owner has submitted an application, fees are paid, but the Board believes it does not have sufficient data or information to accurately rate a boat, a Temporary rating may be provided with the understanding the owner should submit race results during the three months to show data, to verify the Temporary Rating. Temporary rating may be adjusted after review of results. In the event the data is not provided the temporary rating will be considered expired at the end of 120 days. A new complete application (Minus Fees) will need to be presented to board to have the boat*

considered again for a PHRF certificate. The Chief Handicapper may, at his or her discretion, renew the Temporary Rating twice.

- RATING REVIEW – NONE
- ANONYMOUS RATING REVIEW – NONE
- NEW BOATS – 1. Application received by Roster Secretary at least 7 days before meeting. 2. Application complete. 3. Sail number properly obtained from U S Sailing or regionally from SCYA. 4. Dues paid
- Maléna, 2164, Catalina 36MKII – one design class so sail number is OK
- Thunderstruck, IMX38, 35353 – According to U S Sailing this sail number is in a block of sail numbers, 35000s, that have never been issued but this boat has been sailing with this number for a fair amount of time. The new owner cannot purchase this number from US Sailing because it is not a number that can be issued and

therefore changing this number would be a significant expense to change the number on all the sails so the owner is asking PHRF SD to allow him to use this number.

- OLD BOATS
- Zero Gravity, M-Boats Soto 40, 7219 – to sail with smaller jib – wants second rating with a 100% jib
- Next Meeting: Tuesday, December 8, 2020
- Adjourn Handicap Board Business Meeting
- AREA G HANDICAP REVIEW BOARD BUSINESS MEETING
- Call to Order as soon as Handicap Board Business Meeting is adjourned
- Roll Call:
- Confirm Quorum – *A majority of the Area Board members are required to form a quorum and to conduct business. All official actions of the Area Board which concern Ratings or Rating Reviews shall be conducted pursuant to Rules 1.5 and 4.5 of the Rules. All other official actions of the Area Board require a majority vote by the members who are present, provided there is a quorum at the time of the vote. Members: Ivan Batanov, Lani Spund, David Cattle*
- OLD BUSINESS – NONE

- NEW BUSINESS - NONE
- Next Meeting: Tuesday, December 8, 2020
- Adjourn Area G Handicap Review Board business meeting

Additional Information

1. Non-spinnaker offsets – PHRF SoCal is considering changing its formula to:

(Note they do not provide a formula for spinnaker area and they do not include spinnaker area in RSA)

Update RATED SAIL AREA everywhere in the Rules:

Area of Jib/Genoa: $\text{Sqrt} (I \text{ squared} + J \text{ squared}) \times LP/2$

Area of Main: $P \times E \times 0.625$

NSO: $(0.03 \times (\text{Greater of Spin Areas [Sym or Asym]}) \times \text{RLC Rating} + 650) / \text{RSA}$

RSA: $\text{Area of Jib} + \text{Area of Main (per updated above)}$.

2. Performance Factor (PF) Formula

Current PHRF SD Formula

ARTICLE X. FORMULAS

1. Performance Factor (PF) is changed for PHRF San Diego from PHRF SoCal as follows:

- $PF = ((0.67 * LWL) + (0.34 * LOA)) * (SA / DISP)$
- OLD SA Formula = $((J * I) / 2) * 1.55 + (P * E) / 2$
- NEW SA Formula = $((I * (LP * 0.01)) * 0.52) + (ISP * SPL) * 0.66 + (P * E) / 2$ – *Note there is a typo here and this $((I * (LP * 0.01)) * 0.52)$ should be $((I * J * (LP * 0.01)) * 0.52)$*
- LWL = length at Waterline
- LOA = Length Overall
- SA = Sail area
- DISP = Displacement
- J = The horizontal distance from the foreside of the mast at the deck to the forestay where it meets the deck. If the mast is movable at the deck, the measurement shall be made with the mast in the aftermost position.
- I = The vertical distance from the top of the jib sheave to the shear line abeam of the mast.
- P = The distance from the top edge of the boom to the lower edge of the measurement band. If the boom is movable at the mast, the measurement shall be made with the boom in its lowest position.
- E = The distance from the aft edge of the mast to the inner edge of the measurement band.
- LP = The perpendicular distance from the luff to the clew of the headsail. It is assumed to be 155% of J except it is 105% of J for yachts not able to carry an overlapping jib.
- ISP = The vertical distance from the top of the spinnaker sheave to the shear line abeam of the mast.
- SPL = The horizontal distance from the foreside of the mast at the deck to the tack point on the forward end of the bowsprit pole with the pole extended to its fullest length. For fixed bowsprit the distance is to the tack point of the sail.
